Transwhiz Translation System

English/Chinese · Japanese/Chinese
Direct Translation with **Microsoft Office**

Satisfy your needs of fast

and high quality translation

Transwhiz

Word Workbench
Speeds up translation work of WORD documents with integrated working platform. Translates and post-edits sentence by sentence in WORD environment.

Acrobat Reader direct translation
Makes translation directly in Adobe Acrobat Reader.

Translation Memory Database
Edits and saves translation result along with source sentence to translation memory for future translation and for post-editing use. You'll never need to translate the same sentence for the second time.

MS Office direct translation
Makes translation directly in MS Word, Excel, Outlook and PowerPoint with original tables and graphics preserved.

Integrated Translation Working Platform
Makes translation on the integrated working platform with simultaneous display of multiple features (translation, dictionary lookup, memory search etc.) on the screen. A convenient platform for translation and post-translation editing task.

Regular update of program and grammar
Provides built-in automatic routine for periodically updating new program and grammar via Internet.

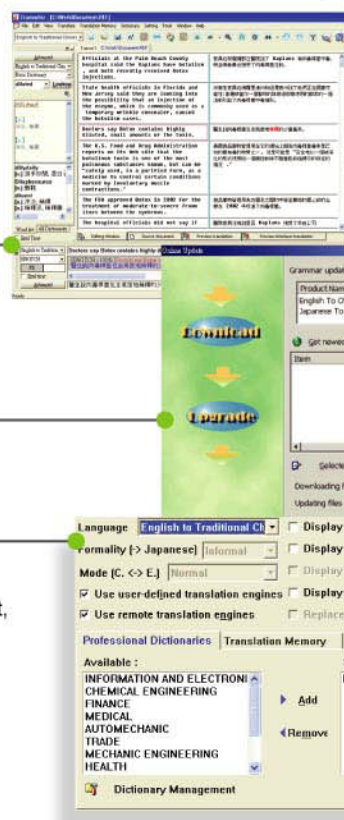

Professional dictionaries
Provides a variety of Professional Dictionaries including Computer & Electronics, Mechanical Engineering, Civil Engineering, Chemical Engineering, Medicine, Law, Financing, Trading, Management, Automechanic, Military, Health Care etc.

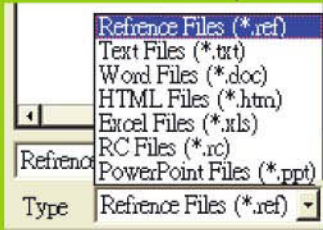

Translation with Finance dictionary

Source	The Nasdaq composite index gained 29.02, or 1.41 percent, to 2,086.66, the index's best close since Jan. 18.
Translation without professional dictionary	那斯達克綜合指數得到 29.02, 或 1.41% 到 2,086.66, 自從一月 18 日以後的索引最好結果。
Translation with professional dictionary	那斯達克綜合指數上揚 29.02 點或 1.41% 為 2,086.66 點, 自從一月 18 日以後的指數的最佳收盤。

Translation with Mechanic and Computer dictionaries

Source	マイクロ研削はシリコンプロセス技術、マイクロ放電加工技術と融合する技術ではありません。
Translation without professional dictionary	微研磨不是和矽處理技術、微放電加工技術競爭的技術。
Translation with professional dictionary	微米研磨不是和矽製程技術、微放電加工技術競爭的技術。

Translation of most file format

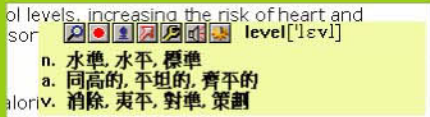

Supports to translate most file formats such as TXT, WORD document, Excel spreadsheet, Outlook mail, HTML webpage, PowerPoint file and RC files etc.

Remote translation via Internet

Makes translation either on your own PC or on OTEK multilingual translation server via Internet.

Automation Server support

Integrates translation functions (word, sentence & file translation) into your own application with Automation Server API.

Mouse-point instant translation

Simply points your mouse to the line of the text or the word you wish to translate. Its translation will be displayed instantaneously.

BIG5, GB conversion

Provides conversion between Traditional and Simplified Chinese. Specific phrases can be designated to be replaced during conversion.

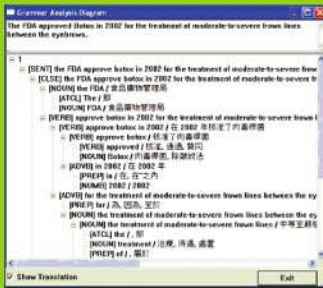

Reverse translation

Provides reverse translation of output to check the accuracy.

Glossary search

Searches a file for glossaries (words or phrases) which appear more than a pre-designated number of times.

Translation analysis diagram

Displays tree-like translation analysis diagram for the translated sentence.

Customized translation engine

Makes your own translation engine and translation memory for any specific language.

Batch mode translation

Preschedule multiple documents for translation in a batch mode.

English & Chinese text-to-speech

Reads word, sentence or the entire English or Chinese article. A great tool for learning English or Chinese.

Webpage translation

Translates entire webpages into the language you want. It's a great helper in surfing on the internet and localizing a website.

Transwhiz wizard

A handy translation program specially designed for translation of internet web page, e-mail and file etc.
